

TELWATER ROOF & MAINTENANCE REPAIR

Telwater (Quintrex)

Telwater is Australia's leading and largest manufacturer of aluminium boat and trailer packages in the southern hemisphere.

Business value created for Telwater

Wiley undertook roof repairs and maintenance over four days, with an urgent turn around required. The project was completed during normal business hours with no loss of trade or production.

The challenging scope that Wiley delivered

Telwater required roof repairs due to rusted material and roof sheets due to the sea salt atmosphere and corrosive fumes from the plasma cutter unit exhaust. This resulted in several major roof leaks.

Telwater Project Points

- Remove and replace all Alsynite sheeting from all three buildings
- Remove and replace damaged roof sheeting
- Replace all roof screws to prevent water leaks
- Replace box gutters with Stainless Steel as required
- Breezeways louvers need to be power wired to remove all rust and loose paint. Recoated in a 2 Pack paint system in situ.
- Wash down entire roof area
- Completed during normal business hours with no loss of trade or production
