Various site works and facility maintenance

Tingalpa, Queensland, Australia

Wiley services delivered: equipment and facility maintenance and project management

Business value created for the client

To ensure the safety of their people and food products, PepsiCo proactively maintain their food processing facilities to the highest standards.

PepsiCo choose to engage Wiley Speciality Projects to deliver maintenance projects at the Tingalpa snackfoods site.

The management and engineering teams value Wiley's capability and understanding of:

- Maintaining strict food hygiene during construction works
- Maintaining operations with no unplanned downtime
- Meeting flexible schedules for work afterhours
- PepsiCo safety systems
- Detailed planning to minimise interruption to operations

In addition to maintenance projects, the broader capability of Wiley in engineering, building codes and project management for example are available to PepsiCo when required.

The challenging scope Wiley delivered

Highly experienced working in operational food processing facilities, Wiley were able to project manage ongoing maintenance projects including:

- Warehouse acid bund
- Raw materials access road
- Fire doors
- Ceiling repairs
- DAF blower enclosure
- Sewer pipe relining
- Waste silo slab
- Various small maintenance projects
