

# Sunnybank Hills State School

## New GLAs and OLAs with amenities

Sunnybank Hills State School many awards reflect the diverse programs of excellence available to children from the surrounding communities.

-  Sunnybank Hills, Queensland
-  \$9.6M
-  Aug 2019 – Jun 2020
-  Design and construction

### Project scope

This project was the first stage of a master plan, providing capacity for future builds and ensuring the school and community are able to accommodate forecasted growth. A key objective of this project was maintaining the school's operations during the delivery phase. Wiley education teams are highly-experienced working in operational environments, where safety is paramount. Our education clients appreciate our flexible approach to programming, ensuring minimal disruption to the school's curriculum program during the delivery stage.

### Business value to client

In the first phase, Wiley demolished modular buildings, shade structures, playground and associated amenities. Wiley delivered a new architecturally designed, two level building, containing:

- Nineteen General Learning Areas (GLA)
- Five outdoor learning areas
- Numerous large undercover areas and amenities
- Two outdoor courtyard areas

Wiley developed a well-planned delivery schedule, working with key client stakeholders, consultants, suppliers and subcontractors throughout the school's Christmas holiday period, ensuring their education program was maintained as much as possible.

Atlas Projects | Diecke Richards

### Project reference

Geoff Mills, Sunnybank Hills State High School Principal (at time of construction)

*The project has been handed over very successfully. We are all extremely happy with the end result. It's a beautiful building that all the children love. The design and construction has been first class.*
